Cologne the 30th of June 2005

Dear Prof. Brusci,

we, the initiators of “plan – Forum for Contemporary Architecture in Cologne” are pleased to invite you to present concept, works and results of the environmental design team Giardino Sonoro La Limonaia Florence during the initial presentation of “klang raum garten”, a main project of the plan-program.

This year, with plan05, the architectural festival is being held for the seventh time from September 23rd till September 30th. The program generates a parcours of approximately 50 stops throughout the city centre. In this context the “klang raum garten”, organised by Frank Schulte, will present it's first project study in form of a sound orientated and illuminative get-up in the area of the Stadtgarten. The Stadtgarten is the oldest park of Cologne and a regeneration zone seated in the centre of the city.

“Klang raum garten” is a project by soundartist Frank Schulte in cooperation with plan project, Istituto Italiano di Cultura, Pro Stadtgarten e.V and the office of cultural affairs Cologne. The concept is combining different branches of knowledge. Works in between architecture, urban design, light design and sound- and media arts.

We deeply respect your experience and knowledge in the field of garden sound design and development of light and sound objects within botanical context.

We are looking forward for your participation into the project and hope to continue this first step of collaboration in the ongoing process of the projects development.

With kind regards

Kay von Keitz
